

Circular No.50/2023-24

2<sup>nd</sup> August 2023

Dear Parent,

Telangana is witnessing a sudden outbreak of conjunctivitis (Eye Flu) due to heavy rains; water logging in the last few days. Cases of pink eye are being reported in higher numbers.

As we all know that, Conjunctivitis (Eye Flu), or pink eye, is an irritation or inflammation of the conjunctiva, which covers the white part of the eyeball. It can be caused by allergies or a bacterial or viral infection. Conjunctivitis (Eye Flu) can be extremely contagious and is spread by contact with eye secretions from someone who is infected.

Preventing the eye flu is necessary for avoiding the inconveniences caused by the infection. One must maintain good hygiene which includes washing hands and avoiding touching eyes with bare or unwashed hands. One must also avoid sharing personal belongings like towels, lenses or glasses. The area where you live should be cleaned properly.

AVN Vida International School is taking all the precautionary measures for the safety and security of the students. Parents are hereby requested to refrain from sending the kids to school in case of any eye infection.

Stay Safe and Healthy!

s/d

Principal
